Profile

Junior Software Developer, currently enrolled in a Full Stack Development Diploma and has a degree in Bachelor of Science (Hons) in Computing. I have 4+ years employment experience in relevant area and I am a valuable team-player with strong communicating skills, willing learner, effective problem-solving skills and self-motivated person. I hope to gain an opportunity to show you what I can contribute to your esteemed organization as well as learn from some of the greatest minds in IT.

Education

July 2022 – Present

Diploma in Full Stack Software Development
Code Institute - Dublin, Ireland -
(Credit Rated by University of West of Scotland)

September 2014 – June 2018

Bachelor of Science (Hons) in Computing
Technical University Dublin, Ireland

Technical Skillset

Languages:	HTML, CSS, JavaScript, Java, ABAP
Databases:	MySQL and SQLite
Frameworks:	Bootstrap
Version Control:	GitHub
Technologies:	Visual Studio, Android Studio, GitPod, Firebase, Wireframes

Projects

- **Barra Barista** – is responsive informational website about the Barra Barista coffee shop. It will allow users to get more information regarding Barra Barista coffee shop (ie. What is in the menu, opening hours, etc.)
Technologies used: HTML, CSS, Gitpod and GitHub: <https://github.com/Jddelara01/barra-barista>
- **Exercise Buddy** – I created an exercise android app that it will keep track of the user's fitness. It also has a social aspect to it, allows users to look for other users that are looking for an exercise buddy to go jogging/walking with.
Technologies used: Java, JavaScript, Android studio (The official IDE for android), SQLite database is for my local database, Firebase is for my external database, Google fitness API, Google maps API and GitHub: <https://github.com/Jddelara01/4thyearproject>
- **BXP Software App** – During my internship at BXP software in 2017, I created an android app for the company that could help their users (door to door sales agents) be able to add, edit, delete, display and save customer information to and from BXP software database using Mobile or table.
Technologies used: Android studio, Java, JavaScript, XML, SQLite database, the company's API and gimp.

Work experience

July 2018 – Present

Business Process Consultant, SAP Dublin

- Deliver services as functional expert in particular Procurement, Material Management and Ariba.
- Analysis of system landscape and technical issues
- Analysis of core business processes for all applications
- Analysis of system and application operations
- Assisting customers in their transition to SAP S/4HANA
- Manage very critical customer issues and help drive resolution as De-Escalation Architect

January – June 2017

Project's Developer Intern, All n One bxp Software

- Working in a fast paced and highly productive environment as part of an Agile feature team.
- Majority of my time was spent on doing a project (bxp software android app) for the company.
- Some other times I go and help some of my colleagues at anything they need. For instance, I did some data migration for one of our clients (Dublin Chamber of Commerce) and I helped one of colleague looked into Jenkins to create an automatic testing system.
- Did some manual testing.
- Did some content developing for Paddy Power also one of our company's client. I enhanced their web page as per request to make it look better.

Interests and achievements

- Participation in Code Institute/Social Soda/Deloitte Hackathon: Time to Close the Gender Gap - Github: https://github.com/StevenWeir038/equality_consultants
- I participated in one of IT Tallaght programme (President's Volunteer Programme 2016) in which I got a certificate of completion at the end of the programme. I tutored secondary students for Leaving Certificate in Maths.
- I'm into online gaming. I also watch and follow Esports Professional Online Games.
- Travelling – I have travelled to a few countries in Europe and hoping that I could explore more countries in Europe and outside Europe.
- Fluent in both languages (English and Filipino)
